RE: Data Summary Report IHSS Group 800-2 (B881) - Approval

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the Data Summary Report for IHSS Group 800-2, dated June 2003 as modified. The IHSS Group 800-2 includes the UBC for B881, PAC 800-1205 (B881 East Dock), and IHSS 000-121 (the OPWL Tank 39). The Division is hereby approving this Data Summary Report for No Further Accelerated Action (NFAA).

Although we are approving this report and no accelerated action may be necessary, it needs to be recognized that the area with high levels of Barium will still need to be properly identified and managed during future demolition/removal actions that will occur in this area. If excavation occurs, the same will be necessary for the areas with high Lead levels. Future concerns regarding this remaining contamination should be resolved through the consultative process.

If you have any questions regarding this correspondence please contact me at (303) 692-3367, David Kruchek at (303) 692-3328, or Elizabeth Pottorff at (303) 692-3429.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
